LIGHT THE NIGHT™

## Night Vision Photography Systems

**AstroScope™ for Nikon. CONVERT YOUR DIGITAL SLR CAMERA INTO A HIGH-PERFORMANCE NIGHT VISION SYSTEM.** Electrophysics AstroScope™ is an advanced night vision module that incorporates a state-of-the-art image intensifier that transforms dark scenes (below 10<sup>-4</sup> lux) into bright, high-resolution images. The AstroScope™ 9350NIKS-3PRO is specifically designed for Nikon AF-type cameras and mounts between the camera body and Nikon AF lenses using the standard Nikon bayonet. AstroScope™ incorporates a high quality optic designed specifically for today's digital SLR cameras and delivers full frame images with little or no vignetting. In wide use with military organizations around the world, AstroScope's battlefield-proven design delivers seamless integration with your camera body and requires no additional batteries or field adjustment, such as back focus. When you need to get the shot, AstroScope™ delivers.

### FEATURES & BENEFITS:

- Use your existing Nikon Lenses
- No back focus adjustment
- No vignetting on most platforms
- Installs in less than 10 seconds
- Powered directly by camera
- Wide range of image intensifier performance offerings

- Maintains existing electronic communications between the camera and the objective lens. All lens functions are retained, including image stabilization.
- Choose from several models offering different levels of low-light performance and take advantage of the opportunity to "swap" a CIU from one AstroScope™ system configuration to another (for example, use one CIU for both a camcorder and a digital SLR camera night vision setup).
- Capture bright, tack-sharp, edge-to-edge image detail. The AstroScope™ system is the highest performance design available for night vision photography.
- Designed for use in field environments, the AstroScope™ system is rugged, compact and versatile.
- Use existing Nikon "AF" & the latest "G" objective lenses.
- Powered directly from the SLR camera. No separate batteries are required.
- Requires no back focus adjustment or special camera training. Simple setup and operation.

# MORO VISION NIGHT VISION

## LIGHT THE NIGHT™

A design that delivers optimum performance in every configuration.

Unlike pocketscope-based night vision setups, AstroScope™ is specifically designed for image capture applications. Only AstroScope™ enables you to use your Nikon lenses to shoot full frame images at distances beyond 1000 meters! AstroScope™ passes all communication signals between the camera body and lens, which ensures features, like image stabilization, work when you really need them. AstroScope's modular design enables you to easily transfer the image intensifier to other camera platforms including Canon SLR, Canon XL-2 and fixed lens camcorders.

AstroScope™ maintains existing electronic communications between the camera and the objective lens.

| Ordering Information |  |
|----------------------|--|
| ITEM                 | DESCRIPTION  |
| 9350NIKS-3PRO        | Included components: Back Body Adapter (BBA), Front Lens Adapter (FLA) for Nikon SLR cameras; plus exceptional-grade, third generation (Gen III) Central Intensifier Unit with the extraordinary sensitivity, resolution and contrast characteristics required for critical, low-light photographic tasks. |

Unlike pocketscope-based night vision setups, AstroScope delivers the sharpest detail and the highest quality full-frame images with no vignetting, on most platforms.

Please call us to discuss the wide variety of Gen 3 CIUs available to meet your specific requirements. 1-800-424-8222
