

# CONFIGURATION MATRIX

(INCLUDES 24/7 RECON, SOP-LW, & RSTA KITS)

**MORO VISION NIGHT VISION**  
LIGHT THE NIGHT™

# 24/7 RECON & RSTA KIT (CONFIGURATIONS)

The **24/7 RECON R/T Tactical Scope Kit** and **Micro RSTA Kits** are unique, advanced tactical pieces of equipment that are unlike any other in the field - the first truly compact, full-featured spotting scopes developed especially for field surveillance and range estimating that integrate existing and new optical and electro-optical systems in new ways. By combining already fielded EO systems with new platforms and accessories, the user can greatly increase the number and types of missions a system can now perform.
