

RSTA Kit: Reconnaissance, Surveillance and Target Acquisition

Morovision Night Vision's Micro Reconnaissance, Surveillance and Target Acquisition (RSTA) kit is designed to give users the ability to fine and record quality images of key battlefield scenes. It can record enemy personnel, battle damage, key terrain, key intelligence data, forensic evidence of actions, etc. There are two basic Micro RSTA kit configurations, an "on the move" kit A and a "hide position" kit B. The RSTA kit B features the Morovision Tactical Tripod for a steady view while in stationary position. Either kit can be supplemented with an extensive array of optional equipment.

Features & Benefits:

- Incredibly small and lightweight 14 Megapixel camera sensor with advanced features
- Rugged connections to join camera and PVS-14 and afocal magnifiers. Afocal lenses can be employed with and without PVS-14
- Rail provides more room for complimentary devices such as DVRs and IR illuminators
- Give new roles to previously fielded optical/EO systems.
- Small, lightweight and inexpensive platform to create new capabilities.
- Shoulder Stock available in different colors, including Desert Tan, Olive Drab and Black.
